Within side-pole umbrellas, they move at different angles according to the sun's position, providing shade. Additionally, when you want to close the umbrella, it gathers around the back pole, taking up minimal space. This model, extremely user-friendly, operates through a leveraged transmission system for opening and closing. With its aesthetic appeal, sturdy framework, the ability to cast shade at various angles, and easy usability, it is highly suitable for use in hotels, restaurants, and villas.
