Mega Manuel Teleskopik Kollu Sistem Şemsiye
Mega Manual Telescopic Crank System Umbrella

Restorant ve cafeler için kalıcı çözüm sunan teleskopik şemsiyemizin manuel modelidir. Teknik özellikleri aynı olmak ile beraber orta-uzun vadede yaşanabilecek şanzıman problemleri de dikkate alınarak; tek bir kol ile opera edilmektedir. Bir kaç saniyede kapanabilen ve otomatik olarak açılan bu modelimiz, kullanıcıların biraz dikkat etmesi ile yıllar boyu sorunsuz çalışabilir. Müşterileriniz altında iken onları rahatsız etmeden açıp kapatabileceğiniz ve mekanınıza değer katacak en sağlam ve uzun ömürlü modellerimizden biridir.

Our manual model of the telescopic umbrella offers a permanent solution for restaurants and cafes. While sharing the same technical specifications as our other models, this version is operated with a single arm, considering potential transmission issues in the medium to long term. This model, capable of closing in just a few seconds and automatically opening, can operate seamlessly for years with a little attention from users. One of our most durable and long-lasting models, it allows you to effortlessly open and close it without disturbing your customers, adding value to your establishment while they are underneath.
