Quadro Şemsiye
Quadro Umbrella

Bu modelin en büyük özelliği tek ayak üstünde iki adet yada dört adet şemsiyeyi açabilme. Çiftli açılımlarda ayak iki şemsiyenin arka tarafında kaldığı için çok geniş bir alan sağlamakda. Dörtlü kullanımda ise çok geniş bir alan tek direkden opera edilir ve ayağın kapladığı alan çok minimaldir. Bu model mekan önleri yada farklı alanları tek direkte gölge bırakmanın en makul yoludur.

The standout feature of this model is the ability to open two or four umbrellas on a single leg. With dual openings, as the leg remains at the rear of the two umbrellas, it creates a very spacious area. In the case of four umbrellas, a significantly expansive area is operated from a single pole, occupying minimal space. This model offers the most reasonable way to provide shade using a single pole in front of spaces or various areas.
